KELLEYS ISLAND AUDUBON CLUB NEWSLETTER FOR

YOU AND ABOUT YOUR NEIGHBORS • SUMMER 2003

Kelleys Island Audubon Club is more than "for the Birds"

By Judy DuShane

"What exactly does Kelleys Island Audubon do?" we're sometimes asked. Regular activities are: the spring "Nest With the Birds" bird walks and nature talks in May during the week following Mother's Day; the Fall Feathers and Foliage Festival usually the last Sat. in Sept., and monthly potlucks and programs from Apr. through Nov. on nature topics. (Don't miss the June Sat. potluck on June 14 with an entertaining and informative presentation about salamanders!)

We do ongoing research and promotion of nature on Kelleys Island with monthly bird censuses and spring and fall bird banding programs. We produce brochures on Kelleys Island's Natural Treasures and distribute them through the Chamber of Commerce, the KI State Park, many local businesses and at the North Pond. Memorials are targeted for specific purposes: the Rosetta Navorska Memorial is for support of the bird census, the William F. Pape Memorial for the Pape Natural History Collection at the KI Library, and the Duke DuShane memorial for interpretive resources on the shipwrecks.

We do special events -participating in our local Islandfest, **Cont. Pg 2**

President's Message

By Pat Hayes

The pale translucence of the chlorophyll in new leaves camouflages the Philadelphia Vireo. The bright red of Scarlet Tanagers is hard to hide in the foliage. The yellow Warbler blends nicely but you can still see the bird. As spring unfolds and summer arrives, you must look closely to see the masters of flight. The migration is over by mid June. The peak was right around mid May give or take a week. Our birds once again returned to Kelleys Island, some to nest and others just passing through on their long flights to northern nesting areas.

The names like Worm Eating, Hooded, Mourning and Cape May will leave most of our vocabularies for several months. These warblers, like many others, will not be seen again till fall. The colorful plumages will be gone come October. The birds will go unnoticed by many when they visit us again this fall. Boy, if you love warblers in spring you better get some good looks. The springtime is for warblers.

Look for bluebirds near our boxes. We had one nesting this year. I haven't checked all our boxes yet but the bird should nest twice so keep looking up on the telephone wires. Report any vandalized boxes so they can be repaired.

Be careful of spraying for spiders. Many birds eat them and feed their young with the tiny insects.

Like life itself the nature of Kelleys Island is constantly changing. Look and enjoy your surroundings. The fields, trees, and streams once taken for granted are slowly disappearing.

Get out of your car, take a hike and remember to look up for eagles!

!!COME ONE—COME ALL!!

SATURDAY, JUNE 14

KIAC Second Annual Picnic

At the Pavilion. We'll provide the soft drinks. You bring your place settings and your family and friends, along with a dish to share.

**Featuring
Salamander Meanderings
By John Katko**

John is the founder of FOWL: Friends of the Wetlands and is their current newsletter editor. He teaches 6th grade Math and Science in Lorain County.

He is a Salamander expert— even believing we have our very own species, the Kelleys Island Salamander!

Come and enjoy a fun evening with the Kelleys Island Audubon, June 14th.

Potluck 6 p.m.

Program 7 p.m.

You are welcome to come for just the program!

DUES REMINDER—2003 DUES WERE DUE IN JANUARY

Who We Are...From Pg. 1

Kelleys Island Homecoming, the Butterfly Festival and the regional Wing Watch. We help support bringing "Back to the Wild" to Homecoming and arrange butterfly programs for the Butterfly Festival. We cooperate with other organizations such as the KI Historical Association with the Butterfly Trail behind the Old Stone Church.

Individual members do many projects that help support and create awareness of the island's natural inhabitants such as studies of dragonflies, butterflies, and frogs and toads as well as the bird studies. Media contacts, website development and this ongoing newsletter and "Kelleys Life" articles help increase awareness of all that Kelleys has to offer.

These efforts help sell Kelleys Island to a wider audience that helps many businesses economically. Eco-tourism is a growing market! Tourists that visit the island to participate in nature-oriented events, spend money at island businesses.

How do we do all this? Most of our money comes from membership dues. We also have an annual raffle and sell calendars, note cards, bookmarks and magnets. We have the memorial donations and an occasional grant. We are a nonprofit organization so contributions are tax deductible. Come to a meeting and join us. For more information visit our website at www.kelleysislandnature.com or contact our president, **Pat Hayes**, at 419.746.2258.

Bird banding over a six-year period has provided invaluable information to the state and naturalists. Photo by Pat Hayes.

The Magic of Kelleys Island Nest With the Birds May 11 - 17—2003

By Lori Hayes

We walked on the wildflower side, watched woodcocks dance and reveled in the Spring Migration during the annual Nest With the Birds Week, May 11 through 17th. The week was a huge success. Bird watchers came from as far as Baltimore, Maryland and Savannah, Georgia and the birds came from as far as Costa Rica and Brazil.

The largest crowds ever turned out for this year's Nest With the Birds. Photo by Pat Hayes.

For the week, 126 species of birds were sighted and some of the highlights were: Golden-wing Warbler, Orange-crowned Warbler, Blue-wing Warbler, Hooded Warbler, Northern Parula Warbler, Bay Breasted Warbler, Canada Warbler, Black Billed Cuckoo (bird - not human!), and the Scarlet Tanager. The week started on the wildflower side with **Allison Cusick**, our retired State of Ohio Botanist taking us to see the rare and endangered Lakeside Daisies in full-bloom and then on to the rare plant community on the northern shore called an Alvar.

If you weren't in love with bluebirds you were after hearing **Dean Sheldon's** program on Bluebirds, Swallows and Purple Martins on Monday. He has recently been elected President of the National Bluebird Society and is also the founder of our sister club - Firelands Audubon Society. He helped our club start a bluebird trail several years ago. You can see 20 of our boxes along the island roads. Dean's enthusiasm for bluebirds was enjoyed by all.

Mary Warren, naturalist at Magee Marsh wowed us with a great slide show on Eagles. The state of Ohio has 86 pairs now in 30 counties after a very successful recovery program. Magee Marsh has over 2,000 acres of wetlands and is one of the top bird watching areas in the country.

Larry Rosche is the field biologist for the Cleveland Museum of Natural History and is fascinated by flying creatures. And they are not necessarily all birds. He has co-written a book on Dragonflies. He said that the best birding in the state is along the Lake Erie shoreline. He would know - he is one of the state's top birders and has walked every county in Ohio.

John Pogacnik is a regular visitor to Kelleys Island, but at a much different time of year. He has been conducting an annual Christmas Bird Count for 20 years. His records are invaluable to bird population trends and bird research. His slide show on the Spring Migration was very interesting because he showed the birds in order of when they appear on Kelleys.

Kevin Metcalf is also a regular to Kelleys Island. You may remember him standing sentry at the Glacial Grooves looking for hawks at the annual Hawk Watch at our Feathers and Foliage Festival. He gave an interesting slide show on Hawk Identification.

The week culminated with Bird Banding all day Saturday, May 17th. The tally was over 100 birds banded and many visitors marveled as they got to see the birds up close during the banding process. Thank you **Tom Bartlett**.

Also, many thanks to those who made the week such a success. The **KIAC Board** who put the week on, the **House on Huntington Lane, Campbell Condo, Gretchen Larsen, and The Inn** for putting up the speakers. Also to the speakers themselves who shared with us their knowledge and excitement.

Monthly Kelleys Island Bird Census

by Delores Cole

The Monthly Bird Census initiated on Kelleys Island is sponsored and funded by the Kelleys Island Audubon Club. This program's focus is to document the importance of Kelleys Island to migratory birds. To date we have documented 218 different bird species on the census days.

It all started back in 1997 during spring Bird Banding. Tom Bartlett mentioned that it sure would be nice to understand how the entire island is being utilized by migratory birds, not just the banding location. He stated that a monthly bird census on the island would give us that information. I innocently asked Tom who would be the right person to head up such an effort. Tom thought for a moment while he was documenting the measurements of a bird that had been netted and then said, I think I would like to do that. I am beginning to like this place!

The KIIAC working with Tom Bartlett, Master Bander, surveyed and planned a designated route around Kelleys Island that includes shoreline, woodland, and limestone prairie habitats. In 1997 the first monthly census was conducted on the third Saturday in September. Tom counted 17,168 birds seen and/or heard from 52 different species that day in September and so it began. Since then, the census has been held on the third Saturday of each month from 7:30 a.m. to 12:30 p.m. regardless of weather conditions and ferry schedules. If Lake Erie is completely frozen and/or the ferry isn't in service, arrangements have been made to fly the census takers to the island.

The census is typically conducted with no less than two and no more than five individuals, who cover the designated route by driving and walking. All bird species seen and heard are counted. Records of each census are tabulated and maintained for review and interpretation, and these statistics are available for public viewing on the *Kelleys Island Birds and Natural History* website under Island Birding: www.kelleysislandnature.com.

The census takers time is donated to this effort as well as their gas to get to the ferry dock. Only the ferry expenses have been paid out of the KIIAC general fund which has been augmented in a past year

by the Rosetta Navorska Memorial Fund.

We appreciate all of you who have donated to this effort in the past and hope that you can continue to help us with your donations. We need your help now to keep this project going forward.

Thank you very much.

KELLEYS ISLAND POTLUCKS, MEETINGS AND PROGRAMS

**July 18, Aug 15,
Sept 19, Oct 17, Nov 21**

Potlucks are held at 6 p.m., with meeting following at 7.

See info on special June meeting picnic on page 1.

The July, August and September meetings will be held at the Pavilion on Addison, and the October meeting will most likely be held at St. Michael's Church Hall. The November meeting will held at **Pat and Lori Hayes'** home, The Inn.

You do not need to be a member of the KI Audubon Club to attend meetings.

Island Meanderings

By Kelley Sanderson

Spring's late arrival this year means that it is still very spring-like at the end of May. I can't remember lilacs still in bloom on Memorial Day, or flowering crabapple trees still so gorgeous. The late and extended blooms allow us to savor the season and enjoy it for a longer time. Thanks, Mother Nature! A nice perspective on spring came from a college course I took on Comparative Religion a few years ago. It was taught by a graduate of Duke Theological Seminary (Baptist) who was ordained as a minister in the Presbyterian Church. It made for interesting theology and a very enlightening class. Anyway, he said that Spring is a time of rebirth, of resurrection, from the death of winter. It is an opportunity to begin again, leaving the old behind, forging new relationships, forgiving errors of the past in ourselves and in others. The beautiful flowers and foliage of Spring surely bring a refreshing of our spirits and hope for better things.

Birds have been everywhere - ducks, grebes and loons swimming in the lake, warblers filling the trees, swallows swooping in the air, Martins lined up on the overhead wires, a pair of nesting Bluebirds in one of our boxes, too many Blackbirds at our feeders. A hike down a back road or wooded trail finds lots of beautiful little birds as they flit about chasing their dinners. Each

year I learn to identify a couple of new Warblers, and I try to listen for their distinctive songs. I have a lot to learn yet!

This afternoon I sat in the sun, snug in a sweatshirt and long pants against the chilly air, the sunshine warming my face. It felt so good. I closed my eyes and listened to the silence of Kelleys Island, before the masses of visitors arrive. The silence was there at first, but after a minute or so I heard a cacophony of sounds - a pair of Canada geese honking to each other as they flew overhead, the hum of the quarry equipment in the background, the horn of what sounded like a Neuman boat, the beep-beep of a construction piece as it backed up somewhere, the buzz of a bumblebee as it swooped past me, the rustle of leaves from the burst of breeze, a pair of Baltimore Orioles singing to each other and me, the whisper of a Hummingbird at the nearby feeder, a Red-winged Blackbird screeching for attention as he strutted his stuff to attract a female. What a wonderful "silence" it was - silent from the noises of the city, noise from the silence of Kelleys Island.

This has been an unusually beautiful Spring, and I wish you the time and inclination to enjoy it. And now I am going down to the North Pond to look for that Worm-eating Warbler someone saw a couple of days ago. It will be a new bird for my Life List, a very small list, I must say.

So, take a hike, enjoy the birds and our beautiful island!

Letter To Kelley's Island Audubon Group:

My husband and I just returned home after spending 2 1/2 days with the Nest With Birds festivities and want to THANK YOU very much for a wonderful event(s). We enjoyed it all and loved seeing all the beautiful warblers.

I did want to also report that on Saturday May 17 at about 4:45PM we walked the boardwalk at the North Pond and are pretty confident we saw a worm-eating warbler. It was to the right of the boardwalk (if facing north) at the area where the billboards are that describe the area and have the pictures. It had a striped head, plain back (grayish/olive in color) and wings, i.e. no wing bars. It was about 3 ft off the ground, flitting around in a bush for about one minute or less then was gone. We stayed for 30 min. hoping it would return but it did not.

We are not expert birders like Kevin Metcalf, but I am not a novice either and feel confident with ID-ing most warblers. Just wanted to let someone know and also to see if anyone else reported one.

Thanks. Keep up the nice work of offering the Nest with Birds week. Here's to excellent birding.

Peg Rowan McGovern and Bill McGovern

Kelleys Island Audubon Club 2003 Raffle

First Prize—Hand Carved Loon by Marty Soski

Second Prize—Birding Binoculars

Third Prize—Hand Carved Shorebird by Marty Soski

Tickets are 6/\$5.00 or \$1.00/ea—Drawing in October

Proceeds to benefit the Kelleys Island Audubon Club

Need not be present to win. Good Luck!

For ticket information and purchase contact:

staff@kelleysislandnature.com or Peg Cooney at 419-746-2614

If we enclosed raffle tickets with this issue of the "Hoot Owl" we'd appreciate you selling them and sending the receipts to KIAC, PO Box 42, KI, OH 43438.

Aunt Cora's Sugar Cookies

Submitted by Gretchen Larson

1 cup sugar
1 cup shortening (1/2 butter, 1/2 margarine)
1 egg
2 cups flour (scant)
1/2 tsp. soda
1/2 tsp. cream tartar
pinch salt
1 tsp. vanilla.

Mix sugar & butter well. Add egg & seasonings. Then flour. Make into balls the size of a walnut. Press flat with glass dipped in sugar. Bake on ungreased sheet at 350 for 8-10 min. Cookies freeze well.

Gretchen brought these to Nest With the Birds and they were a big hit!

Two of the raffle prizes—Marty Soski Carvings.
